

HTML Fundamentals Course

Intermediate Assignment: Combining Days 1 to 5

Build a Recipe Page

This assignment pulls together everything covered so far, structure, text formatting, lists, links, and images, into one complete build.

1. Structure

- Full correct boilerplate
- Descriptive page title in the browser tab

2. Headings and Text

- One h1 with the recipe name
- A short intro paragraph describing the dish, with at least one strong tag and one em tag
- A comment somewhere noting who created the page and when

3. Lists

- An h2 titled Ingredients with an unordered list of at least 6 ingredients
- An h2 titled Instructions with an ordered list of at least 5 numbered steps
- Inside the ingredients list, nest at least one sub list, for example grouping items For the sauce separately from the main ingredients

4. Links

- A top navigation with in page jump links to Ingredients and Instructions using matching id attributes
- One external link to a real source, such as where the recipe inspiration came from, opening in a new tab
- One mailto link for people to send feedback about the recipe

5. Images

- At least one image of the finished dish with meaningful alt text
- Wrap that image in a figure tag with a figcaption describing it
- Set width and height directly on the image tag

Stretch Goal, Optional

Add a description list at the bottom for Prep Time and Cook Time as terms with their values as definitions.
